

**Capacity – Recording sheet:**

Can you measure the capacity of different containers using a measuring jug?

**Challenge: Can you convert your millilitre measurement into litres?**

(Number of millilitres  $\div$  1000 = litres)

Move the decimal point 3 places to the left:

123 ml = 0.123 l      or      1256 ml = 1.256 l

Object	Capacity in millilitres (ml)	Capacity in litres (l)

Which object holds the most liquid?

Which object holds the least liquid?

What is the difference in ml between the object that holds the most and least liquid?
